(3) Air Quality.

(a) General.

(i) The fees assessed are those fees sufficient to cover reasonable costs associated with the development, processing, and administration of the air quality permit program. Such costs are defined as those necessary to administer the permit program, the Small Business Stationary Source Technical and Environmental Compliance Assistance Program, support staff, equipment,

legal services, contracts with consultants and program expenses listed in Section 502(b)(3)(a) of Title V of the 1990 amendments to the Federal Clean Air Act.

(ii) Fees collected shall be placed in a separate non-reverting account within the Department to be used exclusively for the expenses in G(3)(a)(i).

(iii) Except as provided in Section F of this regulation, fees are non-refundable.

(b) Annual Fee. The source owner or operator must pay an annual permit fee to the Department. Beginning on July 1, 1994, and for each subsequent year, fees will be as follows:

(i) \$25.00 per ton (plus Consumer Price Index adjustment) of regulated pollutant based on the actual emissions for the preceding calendar year or any other period determined by the Department to be representative of normal source operation. The CPI adjustment is that percentage of \$25.00/ton equal to the percentage, if any, by which the CPI for the most recent calendar year ending before the beginning of such year exceeds the CPI for 1989.

(ii) New sources or any source without sufficient data to be able to determine actual emissions must be assessed the above \$25.00 a ton fee with appropriate CPI adjustment calculated on a pro rata basis for their months of operation. The fee must be based on permitted emissions, until such time as "Actual emissions" can be calculated, and must be paid before the operating permit is issued.

(iii) Should funds in the non-reverting account exceed the anticipated budgeted expenditures for the following year, the fee described in G.3.b.(i) and (ii) above may be adjusted by the Board. At no time shall this adjustment cause a depletion of funds to a level less than ten percent (10%) of the previous year's expenditures for the Title V permitting requirements of the 1990 Federal Clean Air Act. Any adjustment of fees will require a public hearing to propose the adjustment prior to a final decision by the Board.

(c) Exceptions.

(i) No fees will be assessed for emissions of carbon monoxide.

(ii) No fee will be assessed for actual or permitted emissions in excess of 4,000 tons/year per pollutant.

H. TIME SCHEDULES.

(1) General.

(a) All times given in days are given in calendar days. The last day of the period is to be included, unless it is a Saturday, Sunday, or legal holiday, in which case the period runs until the end of the next day which is not a Saturday, Sunday or legal holiday. With respect to permit reissuance, the schedule for timely action shall apply only if the applicant so elects and notifies the Department in writing.

(b) The day notice is mailed to the applicant that the application is deemed administratively complete shall be counted. If notice that the application is Administratively Complete or notice that the application is not Administratively Complete, together with notice of the specific items deemed to be lacking, is not mailed to an applicant within ten (10) working days of receipt of an application, the time period will begin.

(c) The time schedule shall be tolled when the Department makes a written request for additional information and shall resume when the Department receives the requested information from the applicant. If an applicant fails to respond to such a request within 180 days, the Department will consider the application withdrawn and the application fee will be forfeited. The Department shall notify the applicant no later than 10 days prior to expiration of the 180-day period.

(d) The time periods given in Section H.2 shall be stayed if:

(i) The applicant requests that permit review be suspended;

(ii) The Department at least ten days prior to the expiration date, requests a delay in the review process to which the applicant agrees;

(iii) The Department is requested to hold a public hearing, in which case the time schedule will be tolled for no more than 60 days.

(e) Change in Project.

(i) Determination of Change. The Department may determine that the applicant has filed a new application whenever additional information provided by the applicant during any Departmental review period, in response to any statement identifying deficiencies in the application or supporting materials, or during any period allowed for public comment, either:

1. results in a change in the category in which the permit application is classified, or;

2. significantly increases or changes the nature of the potential effects of the proposed project or activity on public health and safety or the environment. Upon making a determination that the applicant has filed a new application, the Department shall promptly notify the applicant in writing. The notice shall indicate the basis for the determination and summarize the provisions relative to such determinations. The determination that a project has changed shall not be grounds for a request for adjudicatory hearing; however, an applicant aggrieved by such a determination may seek review of the determination as an issue in any appeal of the permit decision.

(ii) Effects of determination on schedule.

1. Immediately upon issuance of the notification, the schedule for timely action shall be suspended.

2. If the determination resulted from a proposed change in design or operation of the proposed project or activity the applicant may, within 30 days, withdraw the change and return to its previous proposal by so notifying the Department in writing. If the applicant so notifies the Department, the schedule for timely action shall resume at the point at which it was suspended.

3. If the determination resulted from any other cause, or if the applicant does not elect to withdraw the change, the Department shall begin a review of the new application pursuant to the relevant schedule for timely action.

(iii) Effects of determination on fee. Unless the applicant elects to proceed with the previous application the original application shall be deemed withdrawn, and the fee shall be forfeited; provided, that the Department shall credit any amount to be refunded toward the permit application fee payable for the new permit unless the applicant requests a refund.

(f) Extension of schedule by other actions.

Whenever a check or other form of payment of an application fee is returned for insufficient funds, or if payment in full is in any other manner prevented, the schedule for timely action shall be suspended. The Department shall notify the applicant of such suspension in writing.

(g) Extension of periods for Departmental action.

(i) The time periods for the Department to take any action shall be extended whenever action by another federal, state, or municipal governmental agency is required before the Department may act, or judicial proceedings then underway affect the ability of the Department or the applicant to proceed with the application, or when the Department has commenced enforcement proceedings which could result in revocation of an existing permit for that facility or activity and denial of the application. The applicant shall promptly notify the Department in writing whenever it believes that action by another governmental agency is required, or that judicial proceedings affect the ability of the Department or the applicant to proceed with the application.

(ii) The Department shall provide written notice to the permit applicant within ten (10) days of making a determination that an extension is necessary. Such notice shall contain a statement of the reasons for which the schedule must be extended.

(iii) When the Department determines that the reason for such extension is no longer applicable, the Department shall so notify the applicant in writing within ten (10) days of making such determination.
